this handbook seeks to examine and advance current understanding  
of the confluence of construction health safety and well being  
and the broad range of industry 4.0 technologies in use in the  
architecture engineering and construction aec industry globally  
the construction sector accounts for more than 100 000  
occupational fatalities annually in many countries reports of  
work related accidents injuries and illnesses are commonplace and  
there is an urgent need to improve the occupational safety and  
health osh outlook of the construction sector the fourth  
industrial revolution presents opportunities to leverage modern  
technologies e.g. big data artificial intelligence automation  
sensors ar vr and robotics to improve the poor osh performance of  
the construction industry however embracing such technologies  
could also induce unintended adverse consequences for the safety  
health and well being of construction workers therefore the  
realisation of the opportunities as well as the mitigation of  
potentially adverse consequences requires research informed  
holistic insights around the union of industry 4.0 and  
construction occupational safety and health management this  
cutting edge volume addresses a significant gap in literature by  
bringing together experienced academics and researchers to  
highlight the drivers opportunities and drawbacks of the merging  
of industry 4.0 with construction health safety and well being  
after a detailed introductory section which highlights key issues  
and challenges section one covers the application of a broad

range of digital technologies then section two discusses the application of industrial production and cyber physical systems in the context of construction safety and health management readers from a broad range of aec backgrounds as well as safety professionals and technologists will come to understand how the technologies are applied and the resulting osh benefits as well as potential drawbacks
